

**Extremely Flexible**  
So versatile, you can protect from single concrete bases to large double or triple concrete bases.

Each Concrete Wrap™ sheet is 44" (112cm) long and either 42" or 48" tall. Two 44" sheets wrap around a 24" diameter round object perfectly. To size the Wraps for your installation, you must know the diameter of your existing object and order the correct amount of sheets.

**To size individual Concrete Wrap sheets:**

1. Measure the circumference of the concrete post
2. Add 12.5" (32cm)
3. Divide by 44" (112cm) per sheet
4. Order by the sheet
